DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-10 and 19, drawn to a transgenic non-human animal whose somatic cells and germ cells are homozygous or heterozygous for an altered agouti-related protein (AgRP) gene which encodes a non-functional AgRP protein (knockout), a cell line from the transgenic, a method making the transgenic and a method of using the transgenic.

Group II, claim(s) 8 and 9, drawn to a transgenic non-human animal whose somatic cells and germ cells are homozygous for an altered agouti-related protein (AgRP) gene and which contain and express a transgene comprising a gene for a non-native AgRP protein (knock-in), wherein said mouse is viable.

Group III, claim(s) 11-16 and 20, drawn to a transgenic non-human animal whose somatic cells and germ cells are homozygous for an altered agouti-related protein (AgRP) gene which encodes a non-functional AgRP protein and homozygous for an altered Neuropeptide Y (NPY) gene which encodes a non-functional NPY protein (double knockout) and a method of using the transgenic.

Group IV, claim(s) 17 and 18, drawn to a transgenic mouse whose somatic cells and germ cells lack functional genes coding for a murine AgRP protein and a NPY protein which contains and expresses a first transgene encoding a non-native AgRP protein and a second transgene encoding a non-native NPY protein.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Art Unit: 1632

Claim 1 does not contribute over the prior art because Qian (Mol. Cell. Biol. July 2002, Vol. 22, No. 14, pg 5027-5035) taught an AgRP knockout mouse.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael C. Wilson whose telephone number is 571-272-0738. The examiner can normally be reached on M-F 10-6:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ram Shukla can be reached on 571-272-0735. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
